Pregnenolone

90 TABLETS / 60-DAY SUPPLY

Support for Hormone Balance & Adrenal Insufficiency

UNI KEY's Pregnenolone contains 5 mg per tablet for hormone balance and adrenal support. The body's own production of pregnenolone is reduced with aging, stress, depression, hypothyroidism, and toxin exposure. At age 75, our bodies typically make 60% less pregnenolone than at age 35.

Did You Know?

Pregnenolone is the precursor of all steroidal hormones including cortisol, DHEA, estrogen, progesterone, and testosterone. Studies have suggested that using supplementation to boost the body's pregnenolone levels provides the same health benefits as taking multiple hormone supplements; however, pregnenolone is not a steroid hormone.

Benefits of Pregnenolone:

- ✓ Buffers the effects of stress
- ✓ Helps cells detoxify poisons
- ✓ Enhances memory, mental function and mood
- ✓ Helps slow symptoms of mental and physical decline
- ✓ Regenerates nerves
- ✓ Increases libido
- ✓ Improves vision

Pregnenolone reduces:

- PMS and menopause symptoms
- Fatigue, anxiety, and depression
- Joint inflammation
- Allergic reactions

note from

Dr. Ann Louise™

"As the 'mother' of all hormones, pregnenolone is one powerful substance. It can make DHEA and just about all the other steroid hormones, including estrogen, cortisol, progesterone, and testosterone. Studied since the 1940s by Dr. Hans Selye—the father of the fight or flight stress syndrome—pregnenolone is helpful for pain control and warding off fatigue. Newer studies have found pregnenolone to be a potent memory enhancer."

—Ann Louise Gittleman
PhD, CNS

Success Stories

"I've been following Ann Louise Gittleman's regimens for a number of years and rave in a most unseemly manner about their efficacy. I started taking UNI KEY's Pregnenolone about 3 months ago and can happily attest that it's taken my health and vitality to another phase—transformative. Well worth considering, even if 'The Fat Flush Plan' is already working for you."

—Claudia, Forum Member

"Pregnenolone—I don't understand what it is or how it works, but it completely stopped the perimenopause symptoms I've been suffering with! I started taking it, and 4 days later I noticed a huge change—no more moodiness or edginess, and my libido resurfaced. I am totally amazed. If I forget to take it, I notice the difference. Also, it's extremely reasonably priced. I will definitely keep buying this! Thanks for everything!"

—Monique S. PA

"I can see a big difference in my attitude! I'm not cranky anymore, and it helps to regulate my cycle!"

—Annette C. Fredericksburg, VA

Usage

Adults take one to two (1-2) tablets daily or as directed by a health care professional.
